

FREE ACCESS PHOTO MANUAL DISSECTION GUIDE OF THE CAT WITH SHEEP HEART BRAIN EYE

Photo Manual and Dissection Guide of the Cat

The Bohensky Dissection Series has been used successfully by more than 300,000 biology students nationwide. Each book in the series is designed to guide the student through the study of anatomical structures. The books do this through the use of clearly marked photographs and illustrations. Accompanying text offers the student both easy-to-follow dissection instructions and factual information about the section under observation. At the end of each chapter there are tests which can be used for self-study or for grade course evaluation. Within the traditional dissection portion of a biology course, many programs include the sheep heart, eye, and brain. Within many of these guides, the author has incorporated photographs of these structures to more closely follow standard course curriculum. The author also provides important information on human organs such as the eye, ear, and heart. In this way, the student can better understand the role and function of these organs as they relate to human life processes. Add to this each book's large-size format, lay-flat spiral binding, and reasonable cost, and you can see why the Bohensky Dissection Series has become one of the most successful dissection guides used throughout this country's schools.

Photo Manual and Dissection Guide of the Fetal Pig

First multi-year cumulation covers six years: 1965-70.

Photo Manual & Dissection Guide of the Rat

This full-color dissection manual is intended to provide an introduction to the anatomy of the mink for biology, zoology, nursing, or preprofessional students who are taking a laboratory course in anatomy and physiology or basic vertebrate anatomy.

A Photographic Atlas of Cat Anatomy

This full-color guide is designed to provide an introduction to the anatomy of the rabbit for biology, zoology, nursing, or pre-professional students taking an introductory laboratory course in biology, zoology, anatomy and physiology, or basic vertebrate anatomy. The rabbit is an excellent alternative to other specimens for these courses.

Current Catalog

External characteristics of the fetal pig; Skeletal system; Muscular system; Digestive system; Respiratory system; Dissection of the sheep heart; Dissection of the circulatory system of the fetal pig; Dissection of the sheep brain; Dissection of the brain and spinal cord of the fetal pig; Dissection of the sheep eye; Dissection of the urinary system of the pig; The endocrine glands of the fetal pig; Dissection of the reproductive systems of the fetal pig.

Books in Print

Includes entries for maps and atlases.

Catalog of Copyright Entries, Fourth Series

The Bohensky Dissection Series has been used successfully by more than 300,000 biology students nationwide. Each book in the series is designed to guide the student through the study of anatomical structures. The books do this through the use of clearly marked photographs and illustrations. Accompanying text offers the student both easy-to-follow dissection instructions and factual information about the section under observation. Subject Guide to Books in Print

Lambing can be a challenging prospect whether it's your first or your thirty-first season. This highly practical manual will take you through the period approaching, during and immediately after lambing. Advice is given on how to deal with a range of situations, from normal and malpresentations to the sick in-lamb ewe, abortion, pre- and post-lambing prolapses, to the health of the newborn lamb. It also covers the problems and emergencies that could arise in the first few days, and the easy-to-follow instructions are accompanied by specially-commissioned illustrations.

Weekly Record

An introduction to the science of neuroplasticity recounts the case stories of patients with mental limitations or brain damage whose seemingly unalterable conditions were improved through treatments that involved the thought re-alteration of brain structure.
